

The number of practicing death doulas has been increasing steadily in the United States, particularly since the Covid-19 pandemic, when death awareness became more in the forefront.

This growth change has sparked a continuing need in our communities to be informed on various options for end-of-life care, especially with the terminally ill.

End of Life Choices California has provided Californians information and support to successfully navigate legal end-of-life options since 2019,

We recognize that the information and knowledge about these options is generally not part of existing doula trainings. We'd like to meet that need.

For more information about the End-of-Life Doula Training or an application, please visit our website or email us.

What is End of Life Choices California?

End of Life Choices California (EOLCCA) was founded as a nonprofit organization in February 2019 out of an abiding belief that all Californians with a terminal or chronic illness should have accurate, up-to-date information about, and access to, all available options concerning their end-of-life wishes.

EOLCCA is a group of educated and passionate people with decades of experience in end-of-life care. We have retired physicians, nurses, social workers, business people and hospice volunteers on our team. **We believe that everyone has the right to a peaceful death.** We also believe that everyone, regardless of whether they are facing the end of life, should know all their end of life options.

Since 2019 EOLCCA has trained volunteers to help clients navigate through their choices at the end of life at no charge to the client.

Benefits of Doula End-of-Life Options Training

End of Life Choices California now offers professional virtual training to already certified doulas from anywhere in the U.S. about all end-of-life options. We are excited to meet this very real need.

We are offering training to doulas about all end-of-life options, including Voluntary Stopping Eating & Drinking (VSED) and Medical Aid in Dying (MAiD) along with others. We hope that all who complete the training will take the information back to their communities, and, hopefully, some of these doulas will meet the needs of rural, diverse and/or underserved communities. Please inquire regarding this possibility.
